

Protection and restriction to the internet

A P U
ASIA PACIFIC UNIVERSITY
OF TECHNOLOGY & INNOVATION

Dear wireless users,

To allow all our users to enjoy quality browsing experience, our firewall has been configured to filter websites/applications to safeguards the interests of our student community in ensuring uninterrupted access to the Internet for academic purposes. In the process of doing this, the firewall will block access to the applications listed in the table below during peak hours (**Weekdays: 8:30am to 5pm**) which:

- **may potentially pose security hazards**
- **result in excessive use of bandwidth, thereby reducing access to online and educational resources by the larger student community**
- **could potentially result in violation of Malaysian Laws relating to improper and illegal use of the Internet**

Nevertheless, you may access the restricted websites/applications if they do not potentially pose any security hazards or violation of Malaysian law from our lab computers during our operation hours (Weekdays: 8:30am – 9:30pm) or you may access via the wireless@ucti or wireless@APU network from your mobile devices after the peak hours.

Internet services provided by the University should mainly be used for collaborative, educational and research purposes in support of academic activities carried out by students and staff. However, if there are certain web services which are essential to students' learning, please approach Technology Services to discuss how access could be granted by emailing to network@apu.edu.my from your university email with the following details:

- Restricted website/application that proposed to be unblocked
- Justification/reason for the website/application to be unblocked

Thank you.

Technology Services, Manager

Asia Pacific University (APU)
Technology Park Malaysia
Bukit Jalil, Kuala Lumpur 57000
Malaysia
